

# Product Guide

What can we make?

This is a question that is difficult to answer for a manufacturer.

It's a little like asking an engineer or a carpenter what they can make from steel or wood, it's an endless list.

Any product manufactured from flexible polythene – We can make.

From tiny tubing from 1" wide to massive 5M wide, which we convert into bags on a roll or boxed.

We make these bags in any thickness, colour and construction.

For example:

- Refuse Sacks
- Flat Bags
- Carrier Bags
- Mailing Bags
- Box lines and covers
- Garment Covers
- Duvet Bags
- Furniture Covers
- Pallet Protection: Stretch Wraps, Shrink Wrap, Pallet Covers & Top Sheets

## Print Capabilities

We produce printed bags from a single random warning notice, up to 8 full colour point-of sale retail bags, with slots to be hung up and adhesive strips to help pack them quickly.

## Specialist Materials

We can make bags that have enhanced properties including Anti-static, UV resistance, Flame retardant - we even make bags that inhibit rust.

## Sustainable materials

We consider ourselves sustainable pioneers in packaging for a brighter future, and offer 100% recycled, 100% recyclable, compostable and degradable polythene.

This is why we don't have a brochure and why our motto is Think Polythene Packaging – Think PSL!

**We do it all!**
