

## CLOSED LOOP RECYCLING

REDUCE  
REUSE  
RECYCLE

### Intro:

We offer our customers the complete service by managing your products even after use. Let us help you #CloseTheLoop

### How it works:

- Step 1:** Send a sample of the plastic to us.  
➤ *We assess the quality to decide what it can be recycled into!*
- Step 2:** We will give you a price per tonne (you only need to pay for the transport!).
- Step 3:** Let us know when you need your 1<sup>st</sup> collection and how regularly you want collections.
- Step 4:** Bundle or pack your scrap plastic onto a pallet.  
➤ *Try to get as much onto the pallet as to maximise transport.*
- Step 5:** Let us know when it is ready, and we will collect it from you.
- Step 6:** It arrives back to PSL, where it is weighed and recycled.  
➤ *The polythene is put through a purpose-built recycling process, allowing it to be re-created into **ARMOURTHENE® REGENERATE** material, which is then made into other products – giving it a “second life”!*
- Step 7:** You receive a credit note for the amount you have recycled.
- Step 8:** At the end of each year, you receive an **ANNUAL PLASTIC RECYCLING CERTIFICATE** showing the total weight you have recycled each year – Take a look at the next page for an example!

The Company Registration No. is 04380650  
The VAT No. is 792946571

# ANNUAL PLASTIC RECYCLING CERTIFICATE

PSL - Polythene Solutions Ltd hereby certifies that:

{COMPANY NAME}

Is committed to the environment and is making meaningful changes to increase the amount of plastic recycled, resulting in less plastic waste going to landfill.

During 2021:  
All polythene packaging supplied was  
**100% Recyclable**  
and {NAME} recycled over **1.3 tonnes** of plastic packaging

By taking part in PSL's Closed Loop Recycling scheme, {NAME} has reduced the amount of plastic going to landfill by a total of 1,327 kilograms during the year of 2021 alone.

The plastic is collected and goes through a purpose-built recycling process, allowing it to be re-created into **ARMOURTHENE® REGENERATE** material. This can then be made into other products, giving it a "second life"
